Retraction Note to: Arlı C, Pamuk S. Is the crushing method really beneficial in concha bullosa surgery? Praxis Otorhinolaryngol 2026;14(3):179-183. <https://doi.org/10.5606/kbbu.2026.2>.

This article has been retracted at the request of the author and with the approval of the journal editor. Upon further review of the data, the author identified an error in the reported numerical values that affected the statistical results and raised concerns about the reliability of the findings reported in the article. The author therefore requested retraction to prevent the dissemination of potentially inaccurate findings in the scientific literature.

The journal approved the retraction in accordance with its editorial responsibilities and commitment to maintaining the accuracy and integrity of the scientific record.
